

Key Responsibilities

- Manage sourcing, purchasing and stock control of all aircraft parts, rotables, consumables and tooling for all fleets.
- Develop and maintain optimal stock levels to support both planned and unscheduled maintenance.
- Ensure traceability, certification and regulatory compliance of all aircraft materials in accordance with UK CAA, EASA, 2-REG and applicable international requirements.
- Implement strategies to reduce AOG response time and optimise supply chain efficiency.
- Build strong working relationships with OEMs, MROs, distributors and repair vendors.
- Negotiate contracts, service agreements and pricing structures to achieve best value.
- Monitor vendor performance, turnaround times and quality standards, ensuring SLAs are met or exceeded.
- Act as focal point with OEM support teams for material supply matters.
- Oversee material logistics including import/export, customs clearance, and global shipping.
- Coordinate critical AOG support, ensuring minimal operational disruption.
- For full job description and list of key responsibilities, please get in touch.

About You

- Minimum 5 years in the private aviation sector.
- Proven experience in a managerial role.
- Fixed wing and rotary experience in parts procurement (would be advantageous).
